Academics

Ph.D. in Computer Science, (03/2016-09/2019)
Federal University of Rio Grande do Sul - UFRGS, Porto Alegre, Brazil
Advisor: Prof. Marinho Barcellos
Co-Advisor: Prof. Marco Canini (KAUST)
Thesis title: Towards a Dynamic Internet Interconnection Ecosystem for Improved Wide-Area Traffic Delivery
Keywords: peering, interconnection, IXP, Internet measurements, wide-area traffic delivery

M.Sc. in Computer Science, (03/2011-01/2013)
Federal University of Rio Grande do Sul - UFRGS, Porto Alegre, Brazil
Advisor: Prof. Claudio Geyer
Thesis title: Maresia: MapReduce in a simple architecture
Keywords: MapReduce, fault tolerance, Distributed Hash Tables

B.Eng. in Computer Engineering, (03/2006-12/2010)
Federal University of Rio Grande - FURG, Rio Grande, Brazil

Research Visits

Visiting Researcher (01/2020-02/2020)
Max Plack Institute for Informatics - MPI-INF, Saarbrücken, Germany
Host: Prof. Anja Feldmann
Keywords: Internet routing, routing security, AS-Path Prepending, Internet measurements

Visiting Ph.D. student (09/2017-12/2017)
King Abdullah University of Science and Technology - KAUST, Thuwal, Saudi Arabia
Host: Prof. Marco Canini
Keywords: peering, interconnection agreements, blockchain, wide-area traffic delivery

Research Interests

My research interests lie at the crossroads of theory and practice of computer networks. I am mainly interested in measuring and analyzing aspects related to the Internet interconnection/peering ecosystem and inter-domain routing. My current research topics include measuring and comparing performance aspects of the different inbound traffic engineering techniques; characterizing the deployment and effectiveness of AS-Path Prepending and its unintended security implications for Internet routing; proposing a methodology to estimate traffic delivery performance metrics of transit ASes; methods to improve the interconnection process. In the past, I have worked in addressing fault-tolerance aspects in distributed architectures, more specifically on the MapReduce model.

Research Scholarships

Research scholarship - 05/2017-04/2018

Scholarship from the Brazilian National Research and Education Network (RNP), Brazil, to work on the project GT-IPÊ-Analytics on activities related to the network analytics and Internet measurements. Supervisor: Prof. Marinho Barcellos.

Master's scholarship - 03/2011-01/2013

Scholarship from the Coordination for the Improvement of Higher Education Personnel (CAPES), Brazil, to support studies during the masters. Supervisor: Prof. Claudio Geyer.

Undergraduate scholarship - 06/2006-12/2010

Scholarship from the National Council for Scientific and Technological Development (CNPq), Brazil, to work in the SIM-3D project on activities related to digital manufacturing. Supervisors: Prof. Nelson Lopes Duarte Filho and Prof. Silvia Silva da Costa Botelho.

Professional Activities

Assistant Professor, Federal University of Rio Grande - FURG, Brazil, 09/2019-present
Courses: Operating Systems; Computer Networks; Internet Measurements

Lecturer, Federal University of Rio Grande - FURG, Brazil, 09/2013-08/2019
Courses: Operating Systems; Computer Networks; Distributed Systems

CTO, Zetaflops - High-Performance Computing Ltda., Brazil, 04/2009-02/2011
Designing and developing solutions benefiting from GPUs parallel processing capabilities

Service

Journal reviews: ACM SIGCOMM Computer Communication Reviews (2019-)

External reviewer: ISCC'19, IMC'17, SBRC'17

Local organizing committee: SIGCOMM'16

Awards

Publications: 3rd-place in the Student Research Competition of the ACM SIGCOMM'18

Travel grants award: PAM'19, ACM SIGCOMM'18, ACM IMC'17, ACM CoNEXT'16

Outstanding lecturer in Computer Engineering - FURG: 2014, 2015, 2016
